- Rowing coach at Unley High school June 2023-October 2023
- Rowing coach at Christian Brothers College November 2020-April 2022

Experience

Academy of Interactive Entertainment

While studying a Certificate III in Information Technology I worked mostly with C# to develop games in Unity as well as basic HTML and CSS to create applications and distribute links to these projects online.

Gym and Fitness

Through my employment here I worked on a variety of projects. Initially I was employed as a web developer, making changes to multiple Shopify stores to improve both functionality and aesthetics with the help of an asana task board. This role then expanded into backend application building namely a shipping calculator that interactant with the Shopify API to provide shipping rates. As well a small amount of experience scripting in Ruby and React JS through Shopify scripts and maintenance of the Force USA app respectively.

University of South Australia

While studying a bachelor's degree in information technology I have learnt the basics of networks and database management. Throughout my network fundamentals course I worked with cisco technology to setup a range of networks from scratch using a command line interface to configure network devices. I performed similar practicals during the data driven web technologies course. Where I designed databases using UML class diagrams, and then implemented these designs using SQL. I also used this course to extend my programming knowledge by learning the theory behind object orientated programming and expanding on this knowledge as I build applications alone and within group environments in languages such as python and java.

Pulteney

Throughout my time at the Pulteney rowing club I have picked up strong communication skills as I have had to develop relationships with students in my care and fellow coaches alike. My role as rowing coach saw me facilitating a safe and productive training program and promoting strong interpersonal relationships amongst my athletes. Stepping up into a junior coordinator role I had more oversight over the Junior program enabling me to better tailor the training program to those younger athletes. I also stepped into a manager role as I helped to develop the coaches around me to better communicate with their athletes.

Awards and qualifications

- Working with Children Check (issued 2021)
- Responding to Abuse neglect (RRHAN-EC) certificate
- Duke of Edinburgh *silver*
- Certificate III in Information Technology
- Covid-19 double vaccinated
- First Aid Certificate
